

Specifications

Ventilation application 

Brakel® Wind/rain control panel WRZ 10M-1G

To control and supply a max. of 10 230V AC drives for ventilation applications.
Connection possibility for rain detectors RM/2 24V or wind / Rain detector RM/2 24V.
Multiplying the wind/rain signal over 4 potential-free relay contacts.

Technical features

- 4 potential-free relay contacts for amplifying and forwarding of a wind / rain signal
- Cascading several WRZ 10M-1G for signal reproduction possible
- Connection of up to 10 drives in a group
- Time-dependent forwarding of wind/rain signal. Configurable via DIP switches
- Time-dependent power supply of the drives (ventilation release despite wind/ rain signal) Configurable via DIP switches
- Status messages via visual display

Technical specifications

Operating voltage	: 230V AC / 50-60Hz
Output drives	: max. 460W
Dimensions (H x W x D)	: 125 x 125 x 60 mm
Protection type	: IP66 (housing)
Housing	: Plastic, gray with lid

QUANTITY: UNIT: piece Individual Price: Total price:
